Could a genetic mutation explain some dogs' tendency to gain weight?

Overweight & Obesity

Prevalence* of Self-Reported Obesity Among U.S. Adults by State and Territory, BRFSS, 2017

*Prevalence estimates reflect BRFSS methodological changes started in 2011. These estimates should not be compared to prevalence estimates before 2011.

Source: Behavioral Risk Factor Surveillance System

*Sample size <100 or the relative standard error (dividing the standard error by the unrounded estimate) > 30%

NatureRx@Cornell
cunature.cornell.edu

Research shows
spending time in nature is good for your health and well-being!

To fill this prescription:
Spend quality time outside. Exercising outdoors is great, but you can also benefit from lying in the sunshine, meditating beneath a tree, watching a squirrel or butterfly, enjoying a sunset, listening to the wind, etc.

Notice how time outside influences your thoughts and mood.

Recommended dosage:
☐ Once a week ☐ 2-3 times a week ☐ 4-5 times a week ☐ 6-7 times a week

Physician signature

If symptoms worsen, visit ganett.cornell.edu/health for more tips or call 607-255-5555 for support.

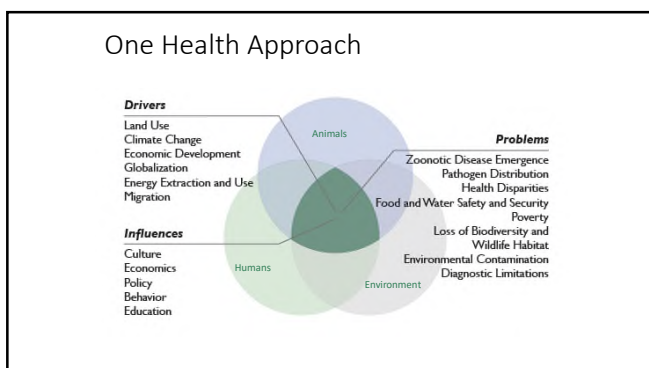

The Secret to Good Health May Be a Walk in the Park

In Minneapolis-St. Paul, the nation's healthiest urban region, almost everyone lives within a 10-minute walk of a good public park. Shouldn't we all?
